FISHING INDUSTRY PRODUCTS

Fishing industry rotator DG-F 360°

The Rotator DG-F has a cast steel frame enabling a compact design. The worm gear has several teeth meshing at one time thus helping to increase the service life of the attachment. A seal fitted as standard protects the rotator against the ingress of dirt and dust. This version includes multi layer surface protection, hot dip galvanized parts, sealed bolts, external lubricant access and is therefore perfectly suited for the fishing and port industries. Rotator forks are recommended for use.

Fishing industry fork positioner DZVW-F 360°

The revolving fork positioner DZVW-GF rotates through 360° and has bolt on forks. The units strong construction with round bar technology guarantees a long service life. The rotator unit has a strong direct drive transmission and is proven in heavy duty applications. Specification Fishery Version: sea water resistant paint, selected hot dip galvanized frame parts, external lubricant access for main slew bearing, sealed bolts where possible, stainless guides and partial stainless cylinders. Not designed for the use with inverted forks. Suitable solutions upon request.
