

Paper roll clamps 360°

PRK 360°

Durwen paper roll clamps feature slimline arm profile and are available in different configurations. Revolving paper roll clamps from Durwen are designed to take rolls in bilge position with regular forklift truck mast tilt of 5° forward. 0° arm design is also available, please ask. The slimline arms have multiple smooth wear protections as standard. Durwen uses the 360° direct drive rotation design for reliable and smooth rotation of reels. The Durwen standard contact plates are feature a steel grip profile. They are easy to maintain and repair. Furthermore there is a large variety of different pads and pad surfaces available. If you do not find the surface that you want please let us know. Models with powered short arm feature sequential positioning as standard. When ordering you can choose alternatively positioning at 45° rotation without add-on price. Later change involves cost. On the following pages you will find a broad overview on the standard range that is currently available. Please do not hesitate to ask us if you do not find the product you are looking for. Durwen produces also Tissue clamps, please ask. We also offer a range of test equipment upon request and can also provide different systems for clamp pressure regulation. The Durwen paper roll clamp range published here requires 160 bar pressure. Less pressure results in less clamping force.

PRK TB with 4 contact plates (standard execution)
Long arm split
