

Tissue roll clamps TRK 360°

TRK 20-50

The **Durwen tissue roll clamps TRK 360°** are designed with ideal geometry for handling tissue rolls. The large rubber-faced contact plates are carefully designed for good friction coefficient and for minimised impact on tissue at the same time. The 360° rotation is based on the Durwen rotator with drive via worm wheel-worm gear.

- 2 hydraulic functions required
- includes hoses and couplings
- safety valve as standard
- contact plates with rubber-coating (smooth or rhombic) as standard, optional with PU-coating
- contact plates convex angled outward upon request

- for picking up horizontal rolls min. 5° most forward tilt required
- powered short arm sequential movement as standard, positioning at 45°, chose on order (no add-on price)
- hydraulic pressure of 160 bar required at forklift truck coupling, less pressure results in less clamping force
- centre cover upon request
- load extender upon request
